

Press Release: The Whetstone Group is pleased to announce a strategic alliance with Emerald Software Group.

Whetstone will now offer Emerald's best in breed web enabled suite of Human Resource business process software solutions that are designed to automate the heavily laden paper transactions associated with the hiring and onboarding processes of HR. These solutions are built with an open architecture that allows for easy integration with an organization's Applicant Tracking System (ATS) and with their Human Resource Information System (HRIS), for a seamless flow to managing all human resource activity.

"Whetstone is committed to improving our client's process efficiencies and reducing process costs. We are excited to be able to offer our clients the tremendous productivity improvements and process efficiencies, not to mention the cost savings, that are gained from Emerald's HR suite", Melissa Bumpers, Principal Whetstone Consulting.

"Our partnership with Whetstone will give our joint clients more service choices," says Emerald president Chuck Ros. "The joint Emerald-Whetstone offering not only delivers award-winning business process automation tools, but also world-class business process improvement services, and opens up our products to several new markets."

Whetstone Consulting Group is a performance enhancement partner in the areas of human capital optimization, technology project oversight and business operations process improvement. Whetstone's consultants are committed to excellence and ensure projects meet the client's strategic needs and enhance their overall organizational performance.

Emerald Software Group's AllegroHR suite of applications streamline heavy-laden HR processes including new hire events like onboarding and critical life-cycle events like personnel actions and provisioning.
